

Eastern Heating & Cooling Council

Training for the HVAC Professional

NATE Certification Review Course

Proper preparation is key in achieving NATE certification. This course was designed to translate the knowledge technicians already use in the field into test-taking readiness. By reviewing the basics of electricity, the refrigeration cycle, and troubleshooting, this course is an excellent preparation for the Core, Air Conditioning and/or Heat Pump exams. Many rewards come from successful completion of the NATE exam. Not only will it enhance public perception of the HVAC trade as a whole, NATE certification generally translates into increased marketability, higher pay and improved job security for the individual. Your participation in the NATE certification program says a lot about how you feel about your career in the HVAC industry and will demonstrate your commitment to professionalism. **Technicians who complete this course will earn 6 NATE CEHs toward re-certification in any specialty certification they already hold.**

Course topics will include:

- Compressor
- Condenser
- Evaporator
- Metering Device
- Electrical Schematics
- Reversing Valve
- Check Valve
- Defrost Circuit
- Heating Mode
- Cooling Mode
- Supplementary Heat
- Thermostats
- Ohm's Law
- Basic Refrigeration
- Superheat
- Subcooling
- Static Pressure

Registration Fee Covers:

- Review Handbook
- Lunch
