

Eastern Heating & Cooling Council

Training for the HVAC Professional

NATE Gas Certification Review

This is a valuable course for technicians preparing to take the Core and/or Gas specialty NATE exam. Becoming NATE certified will demonstrate your commitment to professionalism and will say a lot in relation to how you feel about your career in the HVAC industry. A review that includes electrical concepts and gas furnace troubleshooting will aid technicians in successfully becoming NATE certified, which generally leads to increased marketability, higher pay and increased job security. Candidates for any exam type are welcome to attend the testing session, however the review is designed for candidates interested in becoming NATE certified in Gas Heating.

Course Topics:

- Ignition Diagnostics
- Burner Flame Flashback
- Failure of Safety Shutoff Circuit
- Defective Fan Limits
- Heat Relay Contacts
- Thermostat Troubleshooting
- Blower Relay Coil
- Blower Motor Capacitor
- Vent Pressure Switch
- Blower Relay Contact
- Rollout Switch
- Gas Pressure Regulator
- High Limit Switch
- Gas Valves
- Heat Relay Coils
- Control Transformer
- Condensing & Non-Condensing Gas Furnaces
- Ohm's Law

Course Includes:

- Course Manual
- Lunch
