

Eastern Heating & Cooling Council

Training for the HVAC Professional

Residential Airflow & System Charging

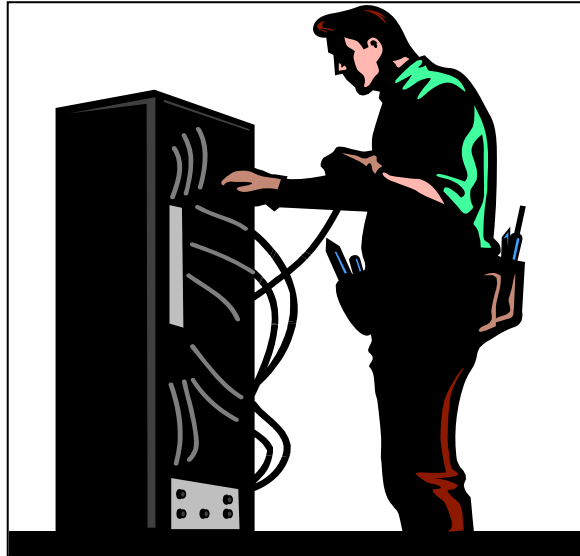

EHCC has developed this combined training session to address airflow and system charging procedures and standards. Approximately two-thirds of all systems are not properly charged, and most technicians lack a sufficient understanding of airflow. In this course, students will learn correct charging procedures and airflow measurements using a method that is easy to understand. Attendees will also receive an air duct calculator and will be taught the **correct** way to use it.

AIRFLOW:

- Volume-Velocity-Pressure
- Duct System Performance
- Measuring System Pressure with Instruments
- Troubleshooting

CHARGING:

- Refrigeration Circuit
- Understanding Saturation
- Charging Methods
- Troubleshooting
- Do's & Don'ts
- Hands-on Instruction

COURSE FEE INCLUDES:

- Certificate of Attendance
- Lunch
